

APPLIED POLICY ANALYSIS

Policymakers and practitioners face many complex problems. Our team has extensive experience in conducting background research, developing policy options and systematically comparing policy tools against objective criteria. We have a range of capabilities to support policy analysis.

POLICY CONSULTATION

Our team is skilled in engaging expert audiences to inform policy objectives and assess the suitability of policy options.

SYSTEMATIC LITERATURE REVIEW

We conduct scoping reviews to map key concepts or systematic reviews to collate evidence for research questions.

JURISDICTIONAL SCAN

We can analyze policies and programs in other jurisdictions, drawing practical lessons for domestic policy design.

COST-BENEFIT ANALYSIS

We can assess strengths and weaknesses of policy options and identify trade-offs between policy tools.

POLICY AND PROGRAM EVALUATION

We are experienced in systematically evaluating plans and programs to inform reporting and redesign.

DATA ANALYTICS

Our team uses data from governments and other organizations to generate insights to inform policy development and planning.
